Einstein College Of Engineering

### 5. 1<sup>st</sup> Place in Tech tonic 2019

National Engineering College

### 6. 3<sup>rd</sup> Place in KIT Hackathon 2019

Kalasalingam Institute Of Technology

## Expereince

### 1. MERN Stack Developer

ChefAtHome FoodTech LLP

03/2021-9/2021

- After a month I prompted as leader for our tech team.
- Fixed lot of security issues in the website.
- Optimized the front end.
- Suggest them to documenting the project.

### 2. Blogger

Codespeedy Technology Private Limited.

01/2021-03/2021

- I write a 10 blog for their website.
- The blog topic is "Learn Reactjs Fundamental in 10day's by building the game" where I cover the fundamental topic that needs to get start with reactjs.
- During this internship, I learn how to convey what I know through a blog. ([Link to article](#)).

## Projects

### 1. Share My Ride

It is a carPooling website. i build this website for my friend final year project.

### 2. InfoG

My friends get irritated by spam messages through WhatsApp. So they asked me for a solution to find who is that scammer. For that, I build this website. We can get the information about the scammer by just sending the link.

### 3. Corona Tracker

This project I build during the lockdown. I have seen a lot of developers build their corona tracker website. So I decided to build my own.

### 4. Typo speed

I learn touch typing to improve my typing speed. For practice, I used to use an online website. But I think why can't I made my own website to practice it. So I build this website using ReactJS.

### 5. Online Rock Paper Scissor Game

I learned firebase. I like to implement what I learned. So I build this dual player online game using python and firebase.

### 6. Tech Scraper

I used to read tech articles from various websites. The thing I hate is I need to visit each site and to filtering the content that I need. It was so much time-consuming. So I build this scraper.

## Hobby

1. Reading Books

2. Youtuber
